FUNCTIONALITIES

N°	Description	
1	If the LED is fixed, the zone is activated.	Operation mode: - Purple: Stop user mode - Red: Heating - Blue: Cooling or dry - Green: Set-point
	If the LED is flashing the zone is deactivated.	
2	If the led is on, it indicates there is a temperature gap between the set-point temperature and the base temperatura (1 led = $\pm 1^{\circ}\text{C}$ / 2°F).	
	If the led blinking it, indicates it has reached the temperature limit set by the User mode function.
