Available for:

- VAF
- ZBS
- Easyzone

- With touch buttons and a LED colored light code

Finished in zamak and tempered glass | Available in: 

If the status LED is **steady**

The zone is on/activated.

If the status LED is **blinking**

If the LED blinks slowly, it means that the zone is off. It can be turned on again by pressing the LED or from the Airzone Cloud app.

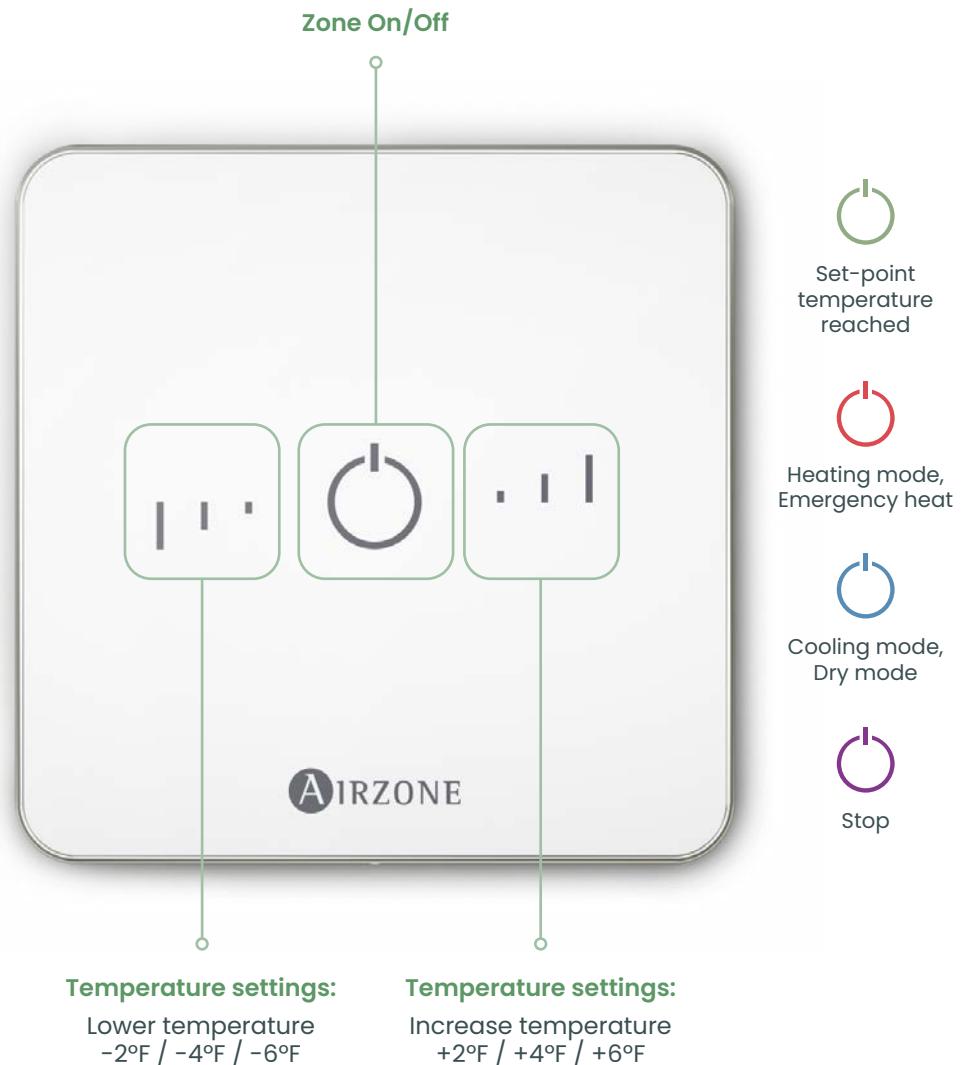

If the LED blinks rapidly in red or purple, it means that there is an error. You can check this from the zone navigation menu on an Airzone Blueface thermostat or using the Airzone Cloud app.

If the status LED is **off**

The thermostat is in energy saving mode, which happen by default. You can configure this in the zone navigation menu from your Airzone Blueface thermostat or using the Airzone Cloud app.

The set-point temperature is the desired temperature.

The default base temperature is 73°F and configured from the *Lite settings* parameter through the zone navigation menu from your Airzone Blueface thermostat or using the Airzone Cloud app.

— Touchscreen icons

For more information, consult the manuals at www.airzonecontrol.com/na/en/support/

Airzone Cloud APP

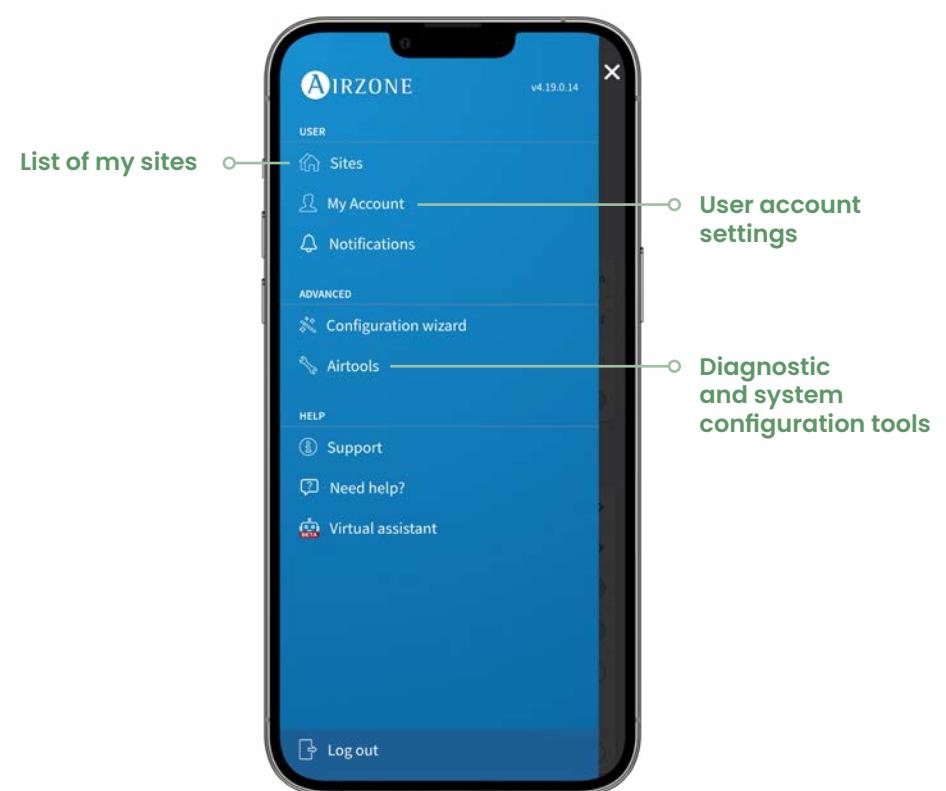

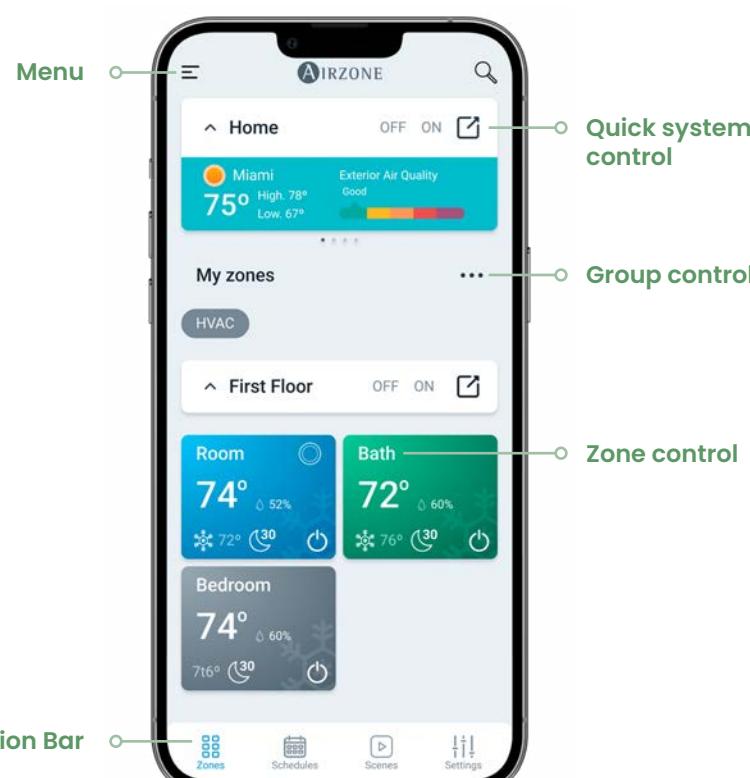

- Your Portable Thermostat

Available for:  

Airzone Cloud

Airzone Cloud
Youtube Playlist >>
