Welcome to the team!

Airzone, the expert in HVAC integration and control, is the newest addition to the Nice Yubii smart home ecosystem.

The Nice Yubii system is designed to offer a **superior home experience** by connecting, integrating, and controlling all the variables of a home: lighting, security, curtains, sound... The system adapts to the occupants' lifestyle and makes the house a personalized space.

Airzone provides a **precise and efficient control of the temperature in a home** by adapting the HVAC system to real needs of users.

Now Airzone joins forces with Nice to offer **even better solutions** for an optimized home experience.
