

Zoning Control Solutions for Inverter/VRF Units

AIRZONE VAF & EASYZONE

Airzone's integrated zoning solutions, designed for Inverter/VRF units, blend the efficiency of this HVAC technology with the comfort of tailored zoning control. By integrating a unique library of **manufacturer-specific communication protocols**, these solutions ensure seamless operation with the HVAC unit, adjusting the performance of the unit to the precise needs of each zone.

Our systems' capacity for **integration and automation** optimizes zone control by minimizing energy expenditure. Moreover, Airzone control solutions function as an integration gateway, facilitating effortless connectivity with Smart Home and Building Management Systems for advanced control and automation.

Manufacturer-specific communication protocols for 180+ HVAC brands

Easy integration with Home Automation and BMS

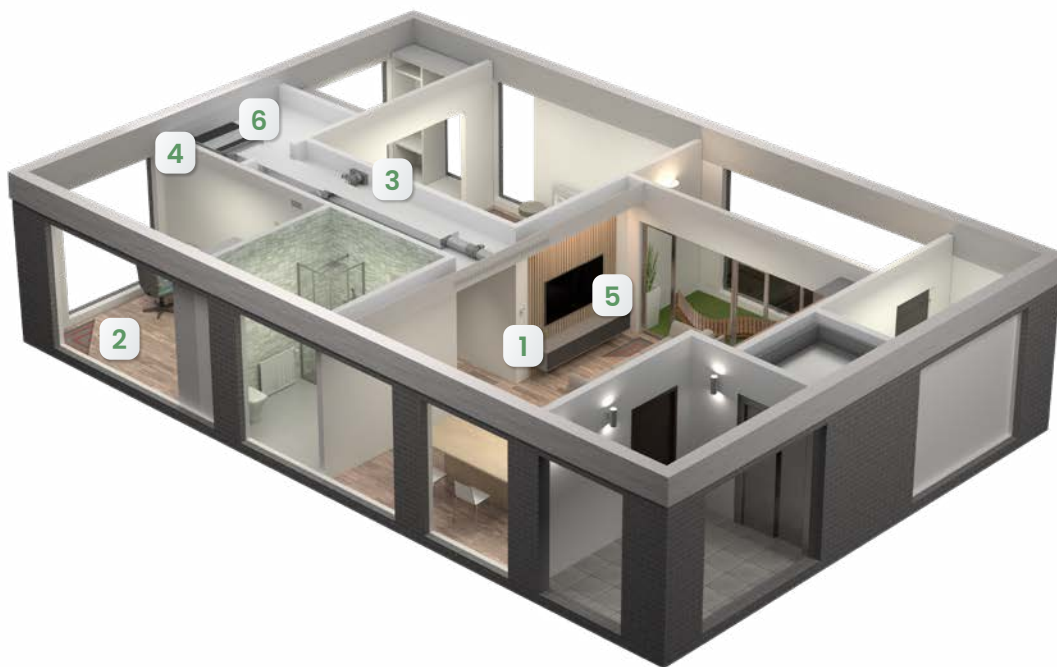

Airzone VAF

LOOSE DAMPER ZONING SYSTEM FOR HIGH PERFORMING HOMES

Airzone VAF is a zoning application designed for Inverter / VRF units, that offers an unmatched ability to adapt to a wide range of residential project requirements. It provides consistent comfort in every zone with fewer air handling units, reducing refrigerant usage, and potentially lowering overall project costs.

- 1** A thermostat per zone

- 2** Zone-supplemental heating module
Compatible with radiant, baseboard and hydronic heating.

- 3** Motorized round dampers
Sizes available: 6", 8", 10", 12" and 14".

- 4** Main board
With manufacturer-specific communication gateway.

- 5** Control via Airzone Cloud app and voice assistant. BACnet, ModBus, Home Automation and BMS integration.

- 6** Compatible with horizontal, vertical and multiposition air handling units.

Easyzone

PLUG & PLAY PLENUM FOR INDIVIDUAL ZONE CONTROL

Airzone's Easyzone zoning kit is composed of an insulated plenum box that includes assembled motorized dampers for up to 6 zones, a control board with a communication gateway, and a neck that perfectly fits each indoor unit model, as it has been designed and adapted for each unit model. All components, besides thermostats, are already pre-wired. All designed to streamline installation and reduce costs, while improving comfort per zone.

Compatible with:

SAMSUNG HITACHI FUJITSU TOSHIBA

1 A thermostat per zone

2 Plenum box

Compatible with ducted horizontal, vertical, and multi position air handling units.

3 Control via Airzone Cloud app and Voice Assistant

Integration with BACnet IP, ModBus, Home Automation, and BMS.

No bypass damper required |
