

# Airzone: Climate Control for Crestron Installations

MAXIMUM COMFORT. PROVEN SAVINGS

# Why HVAC integration matters in your Crestron projects

Heating and cooling account for up to **50% of a building's energy use**. Yet most HVAC systems still operate independently, missing out on advanced efficiency features.

The Airzone + Crestron integration turns HVAC control into **intelligent, sustainable optimisation**—going far beyond simple automation.

AVERAGE ENERGY SAVINGS

MAXIMUM DOCUMENTED SAVINGS

OF THE TIME AT THE DESIRED TEMPERATURE

\*Data sourced from the University of Málaga's report on the Airzone multizone system.

## Key benefits for your projects

 **FASTER ROI**  
Tangible reduction in operating costs

 **ROOM-BY-ROOM COMFORT**  
Custom temperature precision in every zone

 **SMART OPTIMISATION**  
Automatic adjustment based on occupancy

 **QUICK INSTALLATION**  
Upgrade without major works

 **SCALABLE**  
From one room to the entire building

 **UNIVERSAL**  
200+ brands,  
40,000+ compatible models

## Compatible with:

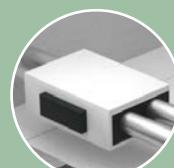

DUCTED SYSTEMS

SPLIT UNITS

RADIANT HEATING

VENTILATION

# Choose your integration solution

From simple setup to full optimisation

Aidoo Pro HUB

Aidoo Pro is Airzone's plug-and-play solution to connect individual air conditioning units to Crestron systems. Designed for installers who need quick, reliable HVAC control without extra complexity.

- Native Crestron integration
- Real-time bidirectional communication
- Standalone setup — no HVAC specialist required
- Direct IP connectivity
- Retains original unit functions
- Multi-brand scalable deployment

**Ideal for:**

- Renovation projects
- Hotel projects

Flexa 25

Flexa 25 brings together ducted air conditioning, radiant heating/cooling, radiators and ventilation under one unified system. It optimises system performance while offering true zoned comfort your clients can feel.

- Real zoning intelligence across multiple systems
- 95% of the time at target temperature
- Unified control interface with web server
- Native Crestron network integration
- Maximum energy efficiency
- Combined ducted + radiant + ventilation management

**Ideal for:**

- High-end homes projects
- Premium hotels
- High-performance commercial buildings

## Adapt the integration method to your project

Airzone systems connect with Crestron in three ways — each suited to different project needs, programming styles, and user expectations. Choose the approach that best fits your scope and desired level of customisation.

**CRESTRON HOME**  
Preconfigured simplicity  
for residential projects

Ready-to-use interface,  
fast deployment without  
custom programming.

**CRESTRON DRIVER**  
Custom programming for  
unique installations

Tailored programming for unique  
interfaces and automation setups.

**BACNET PROTOCOL**  
Enterprise-level integration  
for commercial buildings

Full BMS integration with  
advanced analytics and building  
management features.

Since 1972, **Crestron** has led the way in technologies that simplify connection, collaboration, comfort and control — across every aspect of modern life. Trusted worldwide, Crestron solutions set the standard for smart conferencing, content distribution, automation, and building management.

## AIRZONE

For over 25 years, **Airzone** has specialised in smart HVAC control for residential and commercial buildings. With over **450,000 installations worldwide**, Airzone brings proven HVAC expertise to the Crestron ecosystem. Each Airzone solution is designed with three goals in mind: **measurable efficiency, reliable comfort, and total confidence for installers like you.**
