Airzone, far more than a product

At Airzone, we offer **integrated and efficient heating and cooling control solutions** that put user's well-being first.

We are constantly carrying out **research and development projects to offer the best solutions** on the market and position ourselves as a world leader in air quality and control systems.

An international company

We have a global presence and have our own offices in Spain, France, Italy and the United States.

Technological innovation

We develop solutions based on the latest technology on the market and offer state-of-the-art connectivity.

We focus on digitalisation

Our platforms and tools are available 24/7.

Large range of products

We have a solution for all technologies and all types of HVAC applications.

More than
70,000

Airzone installations
connected around the world
SINCE 2016

Top
13% of companies
with the highest sustainability
ratings. Top 6% of companies in
sustainable purchasing practices

More than
1,3 million tons

of CO₂ saved with our
systems

More than
2 million
heated/cooled rooms
SINCE 1997

More than
90% increase
in comfort*

produced by UMA: airzonecontrol.com/support/downloads

We are working for the change

Integration with HVAC units

Protocols certified by the manufacturer. Improved energy performance and reduced installed power of inverter units.

Control solutions

Solutions compatible with Inverter, VRF, chilled water and boiler technologies. All control is done from a single interface, for both residential and commercial buildings.

Creation of zoning systems

The first step towards optimal comfort: control of ducted units in each room.

1997

2008

Internationalisation of the company

More than 70% of our production operates internationally.

The arrival of digitalisation

State-of-the-art technology with the Airzone Cloud application, tools and on-line technical support.

the world needs

A guarantee of quality

We adapt to current standards to obtain product certifications such as eu.bac and optimise the sustainability of projects by improving BREEAM, LEED or WELL qualifications.

Improvement of air quality

We focus on well-being. Healthy environments with comfort adapted to the needs of the user.

Integration with BMS and home automation

Airzone combines HVAC technology with the latest IoT trends.

Set the living room temperature to 21 °C

We are what we breathe

Switch over to control 360°

Air quality

The well-being of users is at the core of our vision of control. Monitoring air quality is intended to **ensure healthier air.**

HVAC Control

Enjoy easier and faster management and configuration. We're **compatible with all the leading brands in the industry.**

Connected solutions

We offer smart and versatile control, to manage heating and cooling **remotely and at any time.**

Integrated solutions

Our product line has been created with a view to diversity and our solutions can be integrated with **BMS and home automation systems.**

Air quality and HVAC

What is air quality?

Indoor air quality (IAQ) refers to the **purity levels of breathable air** in a building.

Temperature, humidity, CO₂ and **airborne particles** such as dust, mites and VOCs, as well as mixtures such as air fresheners or smoke, all **affect air quality**.

Poor air quality can lead to allergies, fatigue, dizziness, headaches and eye, nose and throat irritation.

More than **90%** of our time is spent indoors

Why treat indoor air?

- We spend **more than 90% of our time indoors**.
- The level of air pollution of indoor air is **2 to 5 times higher than that of outdoor air**.
- We breathe **21,600 times** a day.

Air quality and HVAC

The main challenge of ionization-based air purification systems is to **efficiently direct the air from the spaces to be treated towards the ionizing devices** and, subsequently, to ensure a homogeneous distribution of the already purified air in the application.

Air quality on Airzone Cloud

Thanks to the Airzone Cloud app, you can control the indoor air quality of both your residential and commercial spaces anytime, anywhere.

3 levels of air quality.

Visualization of the air quality graph for each of the measurements (CO₂, PM_{2.5} and PM₁₀, VOC, temperature and humidity).

Operation modes: **activated, deactivated and automatic.**

Scheduling of ventilation and air purification operating times.

Airzone Technology

AirQ Box

AirQ Box is the air purification solution developed by Airzone for rigid ducted HVAC applications, using the same mechanism as nature: ionization. It is based on the generation of negative ions that attach to the harmful particles present in the air to neutralize them.

The challenge of ionization-based air purification systems is **to direct the air from the occupied rooms to the ionizers and then distribute the purified air**. AirQ Box solves this problem by using the existing flow in the HVAC ducts of residential and tertiary installations.

Easyzone IAQ

Easyzone IAQ is a solution that provides **air purification, zoned HVAC and connectivity** to installations with circular ducts in residential and tertiary settings.

Ionization-based purification **removes harmful particles from indoor spaces**. Through zoning, heating or air conditioning units work only in areas where there is demand, and connectivity allows users to control and configure units from their mobile device and voice assistants. This translates into **greater well-being, energy savings and comfort in all rooms**.

AirQ Sensor

CO₂ concentration is one of the air quality variables that can deteriorate the fastest. A 30 m² room occupied by 10 people can reach 800 ppm, the maximum recommended level of CO₂, in 15 minutes, and thus requires ventilation.

AirQ Sensor permanently monitors CO₂ levels to automatically activate the forced ventilation system of the application.

This solution also records the concentration of particles and volatiles and, together with AirQ Box, provides a comprehensive response to air quality problems in residential and commercial installations.

Easyzone CAI

AirQ Box

AirQ Sensor

enjoyourair

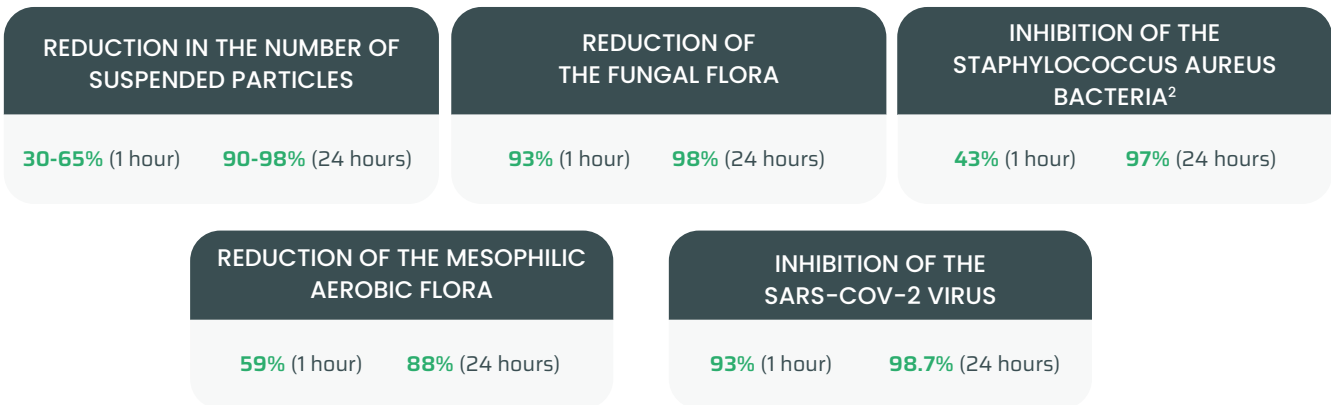

What is Quality Air Zone?

The **Quality Air Zone sign** is used to indicate an indoor space that features an AirQ air purification solution, developed and manufactured by Airzone.

The air in Quality Air Zone spaces is treated to eliminate the majority of the suspended particles that can cause discomfort, allergies or diseases.

You can find the **Quality Air Zone¹** sign on the doors of shops, restaurants, clinics and offices with HVAC systems that incorporate this technology.

Data extracted from studies conducted by the IPROMA, University of Granada and Texcell laboratories.

¹ This sign is supplied with AirQ and Easyzone IAQ products.

² NCTC 8532 strain.

Full control heating and cooling systems

Integration of the main technologies

Our solutions allow centralised control of the **main heating and cooling technologies on the market**, for both multi-zoned and single zone systems.

- Air-to-Air heat pump
- Air-to-Water heat pump
- VRF
- Multisplit and monosplit Inverter
- Domestic hot water
- Boiler

Protocols certified by the manufacturers

We work with industry leaders to ensure **two-way communication**. By using the same communication protocols, we keep the original functions of the unit intact. **We develop communication gateways as well as control algorithms** which, together, make it possible to obtain a high level of comfort and a decrease in consumption.

Controlled mechanical ventilation

Airzone control by means of Easyzone motorised plenums makes it possible to **use the same ductwork for thermal treatment and air renewal**, while keeping them independent and autonomous.

Eco-Adapt: temperature optimisation and limitation

The Eco-Adapt algorithm dynamically adjusts **the setpoint temperature** of the unit according to the return temperature. Eco-Adapt ensures optimum comfort for the user, as well as an improvement in the performance of the unit, since it operates as long as possible at partial load. By applying zone control to a space, **a 20 to 30% increase in performance of the unit is obtained, compared to its rated performance.**

Q-Adapt: control of the speed

Function that enables selecting **the fan speed of the zoned AC units according to the zones on demand.** The solution is thus adapted to the particularities of the application and the needs of each zone in terms of flow. Depending on the system, it is possible to regulate the flow rates:

- By assigning weights to each zone.
- Thanks to 5 preset modes.

Combined control of the air and radiant elements

The control of air stages and radiant elements in cooling and heating mode is combined on a single thermostat. Thanks to the efficiency algorithms, optimum levels of comfort and maximum performance of the application are obtained.

First, we apply state-of-the-art technology to control the thermal inertia of the floor and offer a more pleasant feeling of warmth.

In addition, the air stages provide an immediate sensation of warmth, which allows you to obtain the desired comfort and stabilise unforeseen variations in temperature.

This combination of systems avoids overheating the zones and reduces energy consumption.

The most complete control, wherever you are

The Airzone Cloud app has been revamped to offer you **the best control experience** through a simple and intuitive interface¹ and **the latest Cloud technology**.

IAQ

Add an AirQ Sensor to the system to view the indoor air quality.

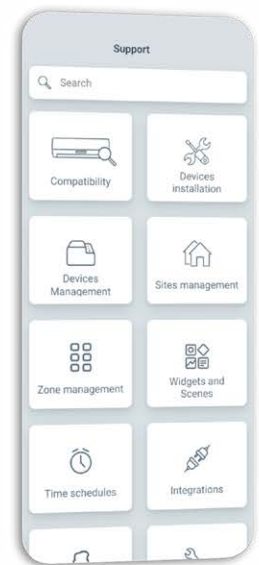

Graphs

View the evolution of the temperature and indoor air quality of each zone.

Scenes

Use HVAC scenes to adapt the operation of the HVAC application to your lifestyle and needs.

Support

Find all the information about the installation and management of an Airzone system in the same app.

¹ An Airzone Cloud Webserver or Aidoo must be installed to use the app.

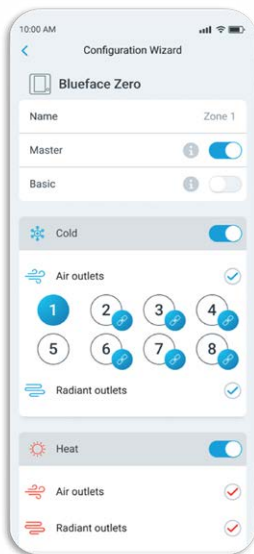

Set the living room
at 26 °C

Voice Control

Only available for 2016 range systems.

Settings

Set up an Airzone system easily thanks to the new configuration wizard.

Energy management

Add a consumption meter to the Airzone system and view the HVAC electricity consumption.

- Display of the consumption graph and data summary when adding a meter to the system.
- Configuration of electricity tariffs (fixed or by sections).
- Cost estimation and consumption distribution.

Integration of heat pumps

Take advantage of the benefits we offer in terms of **integrating building management systems (BMS¹) and home automation**. Let Airzone take care of the control of the heating and cooling systems

Quick and easy integration

Easily integrate any HVAC technology in a very short time.

Integration devices

We have specific devices for KNX, BACnet and Lutron systems.

Simple configuration and programming

Your systems are integrated thanks to our drivers developed with the protocols of main home automation brands.

Cloud API and REST API

Make the most of integration with any platform.

INTEGRATED HVAC CONTROL FROM ALL INTERFACES

- Control of independent zones:
 - › Setpoint temperatures.
 - › Zone status.
 - › Reading of room temperature and humidity on the zone.
 - › Management of the air stage and stage by radiant elements.
- Operating mode of the system.
- Adjustment of the fan speed of the indoor unit.
- Control of domestic hot water (DHW).
- Easy detection of HVAC unit and home automation errors with our stand-alone system.

¹ BMS: building management systems.

BMS AND HOME AUTOMATION

STANDARD PROTOCOLS

IOT

Towards sustainable construction

eu.bac

The eu.bac European certification guarantees the energy efficiency of building control systems, in compliance with the EN15232 standard.

Both for the air vector and for underfloor heating, the value of the regulation of our systems is eu.bac certified with a CA (Control Accuracy) ranging from 0.2 K to 0.5 K. This allows our systems to reduce the application's energy consumption and greenhouse gas emissions, thereby improving the building's energy label.

LEED

System for environmental performance in the construction or renovation of buildings. It seeks to achieve a **reasonable and effective use of energy in terms of materials and water.**

The system evaluates buildings according to 8 criteria and Airzone can earn extra points in:

-  Energy and Atmosphere
-  Indoor Environmental Quality

WELL

Certification guaranteeing that **the space has obtained a certification favourable to the health and comfort of its occupants**. It encompasses 7 fields of application. Airzone has an impact on the following:

Air

Thermal Comfort

BREEAM

System intended to evaluate and certify **the environmental performance of a building**. This method promotes the most sustainable constructions. The system evaluates 10 categories. Airzone optimises the operation of heating and cooling systems and helps improve ratings in the following categories:

Management

Health and comfort

Energy

DGNB

Airzone's air quality and control systems can contribute to improving the percentages obtained in the categories related to:

User Control

Thermal comfort

Energy Efficiency

Indoor Air Quality

Use and Integration of Building Technology

Grants and aids

We help you **take care of our planet**

The major world powers have established **sustainability goals in their strategic plans**. One specific example is the initiative of the European Union, which aims to improve energy efficiency by at least 32.5%. We help you to obtain grants, because **our solutions improve the energy performance, thermal comfort and environmental performance** of buildings.

In Europe, many grants have been put in place to encourage renovation work and the construction of sustainable buildings, both for professionals and for individuals. Through NextGenerationEU and Renovation Wave programs.

How do I obtain grants and aids?

Validated levels of comfort and efficiency

We are aware of the importance of the energy efficiency of our solutions and optimisation of thermal comfort. To this end, we carry out **comprehensive tests in our specialised laboratories**.

We also rely on **independent studies, which guarantee the impartiality of the results** obtained by our solutions.

COMPREHENSIVE STUDIES:
airzonecontrol.com/support

Up to

37%

reduction in
installed power

Reduction of installed power in air-to-water heat pump systems

Explanation of how Airzone allows the use of a less powerful heating and cooling unit, while combating the simultaneous thermal load.

- In cooling, the reduction of the simultaneous load varies from **19 to 47.6%**.
- In colder cities it is reduced to less than **7.7%**, and in more temperate climates it is around **13%**.

30%

Reduction

in greenhouse gas
emissions

Airzone solutions in residential and commercial projects

A ducted indoor unit, controlled by the eu.bac certified Airzone system and under Technical Assessment improves various aspects in heating and cooling projects:

Residential buildings:

- Improvement of the **energy label** of the building.
- Decrease in **overall primary energy coefficient by 50%**.

Commercial buildings:

- **75% fewer indoor units.**
- **44% reduction** in the amount of refrigerant gas present in compliance with standard **EN 378.**

COMPREHENSIVE STUDIES:
airzonecontrol.com/support

Comparison between the Airzone model and a system without zone control

Description of the advantages of a zoned system in terms of thermal comfort, electrical consumption and installed power.

- A zoned system leads to a **reduction in thermal load**, which makes it possible to opt for a unit with a lower thermal power.
- The percentage of **hours of thermal comfort in the zones is much higher** in a zoned system.
- The Eco-Adapt algorithm achieves, on average, **energy savings of 30%, reaching maximums of 64% in heating and 37% in cooling** in specific cases.

BUYING AIRZONE

Creation of quotes and orders.

Your Profile

By registering in the Web platform, from your personal profile you can also manage:

- Delivery addresses.
- Quotations and related orders.
- Returns and warranties.
- Requests for assistance via Tickets.
- Authorization for different functions of your Team.

Follow the status of your order with one click!

Just provide your internal order reference or the number provided by Airzone in the **Tracking** section.

Logistics Services

Airzone's logistics area is dedicated to offering an optimal transport service, seeking a balance between time, service and quality, for national and international shipments.

Incoterms

EXW – Exworks

The customer must arrange transport to pick up the goods at our premises. We can store the order for 20 calendar days at our factory.

DAP – Delivery at place

Airzone is responsible for shipping and tracking the goods until they reach their destination. The customer must arrange the import clearance in the destination country and is also responsible for paying duties and taxes.

Types of services

Land transport by road. Economy service

Groupage service by road. The material may arrive on different days and/or times if the shipment contains more than three pallets.

Air transport. Express service

Used for the **urgent shipment of non-palletized orders.**

DDP – Delivery duty paid

Airzone manages and is responsible for the transit of the goods to their destination, as well as the clearance procedures and derived expenses.

Economy and express air cargo transport

This is used for the **urgent shipment of palletized orders.** Shipment is made with the Economy service or, for an additional amount, with the Express service.

Direct truck transport by road

For orders of more than 9 pallets, the shipment is made by direct truck, in a single delivery, with a security seal and prior appointment for unloading.

Truck transport on a per meter basis

Orders of more than 6 and less than 9 pallets are shipped by truck on a per meter basis and in a single delivery, with notice of the approximate day of arrival, without an appointment for delivery.

International transits by sea transport

Service for the international transit **of orders with a high number of pallets**. Boarding will be arranged with the shipping company, taking into account that the transit time is longer.

Commercial documents

Goods must always be accompanied by the relevant commercial documents for their correct transit and customs management. These documents include the delivery note or invoice depending on the destination country and the packing list with indications of the packaging of the goods with their corresponding HS Code.

Order traceability

EXW orders will receive an email with instructions for picking up the goods.

When shipping is arranged by Airzone, customers will receive a tracking link from the transport company.

Damage and returns

Airzone offers its assistance to claim for possible damage during transport. For this purpose, it is necessary to check the goods upon delivery. If it is not possible to check the goods at the time of delivery, a note should be left with the carrier indicating "Goods to be checked".

In case of damage to the packaging or material, the carrier and Airzone must be notified immediately. Claims must be made to the transport agency within 10 working days.

Sustainability

Airzone is striving to eliminate plastic in the packaging of our goods and implement the use of cardboard pallets. The purpose of these measures is to reduce the environmental impact of our deliveries.

What is Airzone Aidoo?

Connectivity and integration for AC units

Aidoo is a range of controllers for AC units of different technologies that offer reliable remote control and simple integration into Smart Home systems or building management systems (BMS).

The Aidoo range offers specific devices for the main standard communication protocols, such as Modbus, KNX, Z-Wave or Zigbee.

For systems that do not use these protocols, Airzone has developed Aidoo Pro, a versatile line of integration devices.

Pro integration in Aidoo

Aidoo Pro devices respond to a wide range of HVAC integration needs in homes and smart buildings.

Characteristics of Aidoo Pro

- **Wi-Fi communications.**
- Control from the **Airzone Cloud app.**
- Various **Smart Home and BMS integration pathways:**

Drivers:

Control4 | CRESTRON | ELAN | Home Assistant

EEDOM | Nice | RTI | SAVANT | U&C

DELTA DORE | LUTRON | Schneider Electric | SMART CONNECTIVE &

- **HVAC technologies** for which Pro integration is available:

- Inverter/VRF.
- Air to water.
- Fancoil.
- Ventilation.

Integration with third-party elements:

- Digital inputs for sensors.
- Relay output for actuators.

Control and integration of Inverter/VRF units

Ducted AC units

Wall-mounted split units

Cassette

Aidoo Pro Inverter/VRF

Aidoo Pro is a **powerful control solution thanks to the use of the manufacturers' original protocols** and its great integration capacity.

- Communication via **Wi-Fi Dual (2.4/5 GHz)**.
- **Open window detection, occupancy detection and Eco mode.**
- Detection of **communication errors.**
- Compatible with **Blueface thermostat, AirQ Sensor and AirQ Box.**
- Control via **IFTTT, Amazon Alexa, Google Home, Samsung Smart Things.**
- Standard protocols: **BACnet MS/TP and BACnet IP, Modbus RTU and Modbus TCP.**
- **Dry contact with smart thermostat:**

ecobee Nest Honeywell

Pelican telkonet VENSTAR

Aidoo Wi-Fi Inverter/VRF

Aidoo Wi-Fi enables control of Inverter/VRF units from the Airzone Cloud app thanks to comprehensive two-way communication with the indoor unit. It can be installed and configured in minutes, providing advanced functions to new applications and renovations.

- **Bluetooth** configuration.
- **Wi-Fi 2.4 GHz** communication.
- Port for integration via the **Modbus RTU protocol**.
- Control via **Amazon Alexa, Google Home and Samsung Smart Things**.

Aidoo KNX Inverter/VRF

Gateway for **two-way control and integration of Inverter/VRF units in KNX TP-1 control systems**, with easy configuration from ETS.

- Control of any **unit connected in a KNX system**.
- Control of **unit parameters**.
- **KNX control and standard KNX data**.
- 3 configurable **digital inputs**.
- Detection of communication errors.
- Power supply from **KNX bus cable**.

Aidoo Z-Wave Inverter/VRF

Gateway for two-way control and integration of Inverter/VRF units in Z-Wave systems.

- **Z-Wave network** communication.
- **Detection of errors** during communication.
- Control of **unit parameters**.
- **External power supply** via the indoor unit/ with an external power source.
- Port for integration via the **Modbus RTU protocol**.

Aidoo Zigbee Inverter/VRF

Gateway for **home automation integration of Inverter/VRF units in Zigbee systems**.

Aidoo Zigbee is certified by the Connectivity Standards Alliance, allowing interoperability on any Zigbee network according to Alliance standards. As a permanently powered node, it acts as a repeater and improves network reliability.

- Compatible with all **Zigbee 3.0 certified controllers**.
- **Two-way communication** with the AC unit.
- **Detection of errors** during communication.
- **External power supply** via the indoor unit/ with an external power source.
- **Control of unit parameters**.
- Port for integration via the **Modbus RTU protocol**.

Control and integration of fancoil units

Ducted AC units

Wall-mounted split units

Cassette

Floor unit

Aidoo Pro Fancoil

Allows **fan control** for both **0-10V** and **3-speed units** and valve control for both on-off and proportional valves.

- Communication via **Wi-Fi Dual (2.4/5 GHz)**.
- **On-demand control** of all/nothing or 0-10 V solenoid valves.
- **Three-speed** or 0-10 V fan control.
- Open window detection, occupancy detection and Eco mode.
- **Measurement of room temperature** and cooling and heating battery temperature.
- **Automatic mode change** by supply temperature detection.
- **Control with Blueface thermostat or room temperature probe**

Aidoo Pro Fancoil

BMS control

Airzone Cloud

Control and integration of air to water units

DHW control

Air to Water

Aidoo Pro Air To Water

Aidoo Pro Air To Water is a **device for the remote management of air to water units via the Airzone Cloud app**. Thanks to its wide range of integration options, **it allows the management of these units from home automation systems and building management systems (BMS)**.

- Communication via **Wi-Fi Dual (2.4/5 GHz)**.
- **Two-way communication** with the unit.
- **Control of the different AC unit parameters**.
- **Detection of errors** during communication.
- **Multi-user and multi-session**.
- **Time scheduling** of temperature and operation mode.

Aidoo KNX Air To Water

+ New!

Aidoo KNX Air to Water is an integration gateway that **enables two-way communication with air to water units** through protocols developed in collaboration with unit manufacturers.

- Control of **HVAC parameters**.
- Control of **DHW parameters**.
- **Select the temperature** for the **domestic hot water tank**.
- **High power function** for faster production.
- Fully **interoperable with KNX**.
- Measures the system's **energy consumption** (if permitted by the unit).

Control and integration of ventilation units + New!

Ventilation units

Aidoo Pro Ventilation

Aidoo Pro Ventilation **allows you to monitor and activate a ventilation system in order to improve indoor air quality.** The device manages the system parameters remotely, improving energy efficiency and user well-being.

- Reading of **air quality sensors.**
- Reading of the **extraction and supply temperature.**
- **Humidity reading.**
- Control of **operation mode and speed.**
- **Heating recovery operation.**
- **Bypass operation.**
- **Filter status.**

¹Opcional.

Aidoo apps

Different types of Aidoo devices can work in conjunction to extend the functionalities of systems that combine different types of units.

Aidoo Pro Air To Water with Aidoo Pro Fancoil

Aidoo Pro Air To Water combined with Aidoo Pro Fancoil makes it possible to manage **systems with an air to water unit as a production element and a fancoil unit as an emission element, all from the Airzone Cloud app.**

This combination of two Aidoo devices, which are easy to install and configure, allows complete control through a simple architecture.

Aidoo Pro Inverter/Fancoil with AirQ Sensor and AirQ Box

Aidoo Pro Inverter combined with AirQ Box offers an **integrated solution to manage HVAC and air purification in systems with inverter units**, all accessible from the Airzone Cloud app. This combination is joined by AirQ Sensor, linked to a ventilation unit, to monitor and manage air quality.

This combination of devices, designed for easy installation and configuration, facilitates control and improves indoor air quality, ensuring a healthy and comfortable environment.

Indoor air quality

Indoor air quality solutions.

AirQ solutions improve indoor air quality through ionization-based air purification and mechanical ventilation control regulated by air quality sensors. With AirQ, it is possible to **combine HVAC with purification through ionizers** distributed in the ductwork, and with automatically controlled ventilation.

Aidoo Pro. Control of the indoor unit and ionizers

Ventilation control

AirQ Sensor. Room air quality and ventilation performance

AirQ Box. Up to 6 ionizers

- Measurement of **CO₂ levels, PM_{2.5} and PM₁₀ particles, volatile organic compounds,** temperature and humidity.
- **Air quality status** indicator.
- **Reduction in pollutants** through ionization (particles) and ventilation unit control (CO₂, VOC).

- **Operation modes:** automatic, activated and deactivated.
- **Graph-based reports** on the improvement and evolution of air quality levels in the Airzone Cloud app.

Reference	Description	Units
1 AZAI6WSP [XXX]	Aidoo Pro [Brand] by Airzone	1
2 AZX6AIQBOXM	AirQ Box in-duct IAQ monitoring and control device	1
3 AZX6AIQSNSB	AirQ indoor air quality (IAQ) sensor	1

Health, well-being and comfort

With the AirQ Sensor, **we control ventilation, and thanks to the AirQ Box, we ensure indoor air quality**, reducing allergens, pollutants and odors, while maintaining low CO₂ levels. This combination not only improves health, but also enhances cognitive abilities, prevents diseases and promotes better quality sleep.

Efficiency and savings

The smart management of mechanical ventilation performed by AirQ Sensor on demand **reduces the ventilation load by up to 21%**, extending the service life of filters and fans.¹

AirQ Box reduces the number of suspended particles, so the AirQ Sensor will reduce your need to take action on the recovery.

A single app

Our unique solution **combines HVAC and air quality in a single app**, making it possible to control purification and ventilation in any of the three operation modes, program time schedules or combine actions in scenes. It also offers graphs showing air quality evolution.

¹Applicable if the system has an Airzone Cloud Webserver.

Zoned control system

Motorized plenum for zoning and air quality in installations with circular ducts

Easyzone IAQ is the **Plug&Play solution** for applying zone control to an indoor unit with flexible ducts. **It controls 2 to 8 zones** independently and from anywhere with the **new Airzone Cloud app**. Available as an open system, Flexa 3.0.

Up to 8 Ionisers

Air quality sensor

Easyzone now also purifies the air by zone

Easyzone **purifies and improves the indoor air quality** of each zone. Each motorised damper includes an ioniser that purifies the air, based on the air quality level detected.

- Dynamic control of **setpoint temperatures** for better energy efficiency.
- Limitation of minimum and maximum temperatures for effective control with the **Eco-Adapt function**.
- Custom-made plenum for each indoor unit, **Plug&Play**.
- **Monitoring of indoor air quality** via AirQ Sensor.
- **Control of electricity consumption** thanks to the consumption meter.
- Dynamic control of set-point temperatures with the **Q-Adapt function**.

More comfort, less time

By combining the operation of water, air and radiant stages, you can achieve thermal comfort conditions in the shortest possible time.

Now you can control different types of radiant cooling and heating sources (underfloor heating and cooling, Electric underfloor heating, ceiling cooling, water or electric radiators) and reduce installation time thanks to the new radiant elements module.

More efficient heating

The production control board enables automated management of zones with demand. The production of the air to water system and the recirculation pumps will therefore work, avoiding overconsumption.

¹ Optional.

{ REST:API }

Local API

Modbus

Gateways

We control the following parameters

- The operating mode of the application.
- The fan speed of the indoor unit.
- Domestic hot water (DHW).
- Error detection.
- The data of each zone:
 - > The status of the zone.
 - > The reading of the room temperature and humidity.
 - > The set-point temperature.
 - > The management of the air stage and radiant elements.

Airzone Cloud Webserver HUB

The new Airzone Cloud Webserver HUB module **allows Airzone systems to connect to the Cloud**. Always keep control of your applications, by transforming your devices into control interfaces. Any time, anywhere.

- Control up to 32 Airzone systems.
- Ethernet port.
- RS485 port for BACnet MS/TP, Modbus RTU.
- 2.4 GHz/5 GHz Wi-Fi connectivity.
- Bluetooth Low Energy (BLE) connectivity for configuration.
- Allows configuration as Lutron, BACnet IP or Modbus TCP/IP.
- Remote update of Webserver firmware and connected systems.
- Remote management of system errors.

BACnet IP and MS/TP

- Plug&Play.
- One Airzone Cloud Webserver HUB as BACnet gateway per system.
- Control up to 32 systems.
- Accessible from Airzone Cloud.
- Ethernet/Wi-Fi connection.

Local API

Direct IP communication with the local web server, Airzone Cloud Webserver HUB.

- Plug&Play.
- Control up to 32 Airzone systems.
- Accessible from Airzone Cloud.
- Ethernet/Wi-Fi connection.

The local API is open to allow the integration of HVAC applications with home automation systems.

Lutron

- Plug&Play.
- One Airzone Cloud Webserver HUB as Lutron gateway per system.
- Control up to 32 systems.
- Accessible from Airzone Cloud.
- Ethernet/Wi-Fi connection.
- Compatible with Lutron Palladiom thermostats.

Modbus RTU y TCP/IP

- Plug&Play.
- One Airzone Cloud Webserver HUB as Modbus gateway per system.
- Control up to 32 systems.
- Accessible from Airzone Cloud.

KNX Gateway

- One KNX gateway per Airzone system.
- Control up to 14 zones.
- KNX certified product.
- KNX standard data.
- Configurable from the ETS.
- Compatible with KNX thermostats.

Modbus RTU

Direct control from the home automation port of our main controller. All our products use the Modbus RTU protocol natively.

- Control up to 99 Airzone systems.

New features 2023/2024

Flexa 4.0 / Easyzone

The new generation of Flexa and Easyzone systems **adds zoned control to underfloor heating/cooling systems and radiators**, allowing joint management of air conditioning and heating from the same zone thermostat. It incorporates Artificial Intelligence in the management of thermal installations in buildings.

AirQ Sensor

AirQ Sensor is a device designed to **measure indoor air quality and control elements to improve it**. Depending on the elements installed, AirQ Sensor can activate the ventilation system or the AirQ Box ionization modules.

AirQ Box

AirQ Box takes advantage of the air circulation in ducted HVAC applications to **neutralize particles** such as dust, mites, pollen, bacteria and viruses **through the negative ions emitted**.

Aidoo Pro Ventilation

Aidoo Pro Ventilation **improves air quality through complete control from the Airzone Cloud app.** Compatible with Home Automation and Building Management Systems, it allows monitoring and activating ventilation units, ensuring an optimal indoor environment.

Aidoo Pro with AirQ Sensor and AirQ Box

Aidoo Pro, along with the AirQ Sensor and AirQ Box, creates an **integrated solution for climate control and air quality management, controlled via the Airzone Cloud app, a Smart Home system, or BMS.** This setup manages an Inverter/VRF unit, monitors indoor air quality, and activates a ventilation system or an AirQ Box device based on the concentration of CO₂ and harmful particles in the conditioned space.

The combination of these devices facilitates easy installation and configuration, offering efficient control and significantly improving air quality.

Aidoo KNX Air-to-Water

Aidoo KNX Air-to-Water is a KNX integration gateway that **enables bidirectional communication with air-to water heat pumps through protocols developed in collaboration with unit manufacturers.** This integration allows for the management of production, temperature control, and the scheduling of heat pumps from a KNX home automation system.

Motorised Air diffusion

Motorised dampers

Motorised circular duct damper

Motorised circular CPCC duct damper which, attached to a circular duct, controls the passage of air in the zone served. The circular duct damper includes a flow control system that allows manual configuration of the maximum and minimum opening values of each damper, according to the needs of each application.

CPCC [LENGTH] [HEIGHT] MTE

Motorized rectangular duct damper

CPRC motorized rectangular duct damper to control the air inlet of the zone when attached to an air distribution rectangular duct.

CPRC [DIAMETER] MTE

Air diffusion

Grilles

Horizontal-vertical double deflection fan grille

RDHV diffusion grille in extruded aluminium with standard 26 mm frame and horizontal and vertical movable blades, individually adjustable, which allows the range and airflow to be adapted to specific needs. The following options are available:

- All/Nothing: the damper occupies 100% of the grille.
- Minimum air: the damper occupies 80% of the grille.
- 2 in 1: the damper occupies 50% of the grille.

RDHV

Return grille with filter holder

RRFR diffusion grille in extruded aluminium with standard 26 mm frame and horizontal movable blades, individually adjustable, which allows the range and airflow to be adapted to specific needs.

Fitted with a filter to protect and prevent air intake with a high concentration of suspended particles and other foreign bodies.

RRFR

15° Fixed linear blade grille

Diffusion grille in extruded aluminium with standard 26mm frame and blades that promote airflow. The following options are available:

- All/Nothing: the damper occupies 100% of the grille.
- Minimum air: the damper occupies 80% of the grille.
- 2 in 1: the damper occupies 50% of the grille.

RLQ1/RLQ2/RLQV

Linear diffusers

Airzone linear diffuser

Long-range DFLI linear diffuser with 1 to 4 outlet slots, which promotes air blowing in two directions with the help of movable blades. Designed to be installed on a ceiling. Installation using a mounting bridge or a plenum. It is necessary to have the PLEN linear diffuser plenum.

DFLI

Diffuser plenums

Grilles plenum with circular duct connection

Plenum for PREJ diffusion grilles made of galvanised steel, with mechanical flow control. Circular/elliptical connection for circular duct adaptable to front or top opening. PREJ-Ts have type 25 Bs1d0 + 5 mm thick PS Alu insulation. Compatible with the family of diffusion grilles without motorisation and without adjustment elements.

PREJ-T

Insulated mixing box

Designed to collect return air and/or air from the by-pass and reintroduce it into the intake of the indoor unit. The device is supplied with pre-cut outlets (5 elliptical and 2 circular) and 3 elliptical openings, to be mounted on the front or on the sides. The filter holder return grille (RRFR) can only be mounted on BR 400 or 500 plenums.

North: Castilla y León, Aragon, Catalonia, Galicia, Asturias, Basque Country, La Rioja and Cantabria.

Ceuta and Melilla: Ceuta and Melilla

Balearic Islands: Balearic Islands

Canaries: Canary Islands

General Terms and Conditions of Sale

These General Terms and Conditions of Sale (hereinafter the "GTC") apply to any contract of sale and/or provision of services between CORPORACION EMPRESARIAL ALTRA, S.L., a Spanish Company, with Tax ID B92611102 and VAT EU number ESB92611102, (hereinafter Altra Corporation or the "Seller") and professional customers (hereinafter individually the "Customer(s)" or the "Buyer(s)").

The Customer declares to be a professional acting in the context of their activity and not an end user.

Unless otherwise agreed in writing, when an order is sent by the customer, this implies their adherence to these GTC and this, notwithstanding any contrary condition set by the Customer which will be, in the absence of express acceptance, unenforceable against Altra Corporation regardless of when it may have been brought to their attention. It is only after written acceptance of the order by Altra Corporation accompanied by these GTC that both parties are bound by the sales contract.

Any order placed by the Customer in accordance with the conditions provided for in the article "Orders" below, implies its unreserved acceptance of these GTC.

The information on catalogues and commercial proposals is given for information purposes only, Altra Corporation reserves the right to modify them at any time and without notice.

Any modification of the GTC must be the subject of an express written agreement of Altra Corporation. The Customer will thus not be able to rely on an alleged tacit agreement resulting from the silence of Altra Corporation.

Orders

All orders must reach us at the address orders@airzonecontrol.com or via the www.airzonecontrol.com platform. During each order, the Seller sends by e-mail and as soon as possible, an order acknowledgment indicating: the summary of the order, the prices and the expected date of exit from our factory stock. To place the order, the Buyer must create a customer account by following the instructions on the Altra Corporation website www.airzonecontrol.com. The Buyer is obliged to report any errors or omissions in the order acknowledgement within 24 hours of the reception of the order confirmation. After this period, no dispute can be accepted, and the order will be considered accepted by the Seller and the Buyer and therefore final. The Buyer has the right to cancel his order within a maximum of 24 hours after receipt of the order acknowledgment by an email request to the address: orders@airzonecontrol.com. Orders are likely to be delivered in split shipments, depending on the characteristics of the order or at the request of the Customer, for a transport surcharge for any request for early delivery. When the selection of the proposed material is made by

Altra Corporation based on the information provided by the Buyer, Altra Corporation assumes no responsibility that may result from inaccurate or incomplete data. It is always the Buyer's responsibility to ensure that the characteristics of the proposed equipment correspond to its needs, both in terms of performance and of implementation possibilities.

The sale will be made at Buyer's own risk. The photos presented in our catalogues are not contractual.

Price

The prices invoiced to the Customer are prices excluding taxes, denominated in Euros, packaging included, transport costs being invoiced in addition and are established based on the rate in force on the date of the order.

The rates in force are those appearing on the quote of Altra Corporation or any other medium used by Altra Corporation, provided that appears on the said medium a date of validity of the prices. In principle any quote is valid for a maximum period of fifteen (15) days. However, Altra Corporation reserves the right to modify its prices at any time.

In the event of a change in prices after the quote, and more generally if the prices appearing on the quote do not comply with the prices in force, Altra Corporation will inform the Customer, being reminded that the contract cannot be formed and bind Altra Corporation as long as it has not accepted the order by means of the acknowledgment of the order. The Customer must then send a new corrected order. However, Altra Corporation undertakes to invoice the equipment ordered at the prices indicated at the time of the Customer's order acknowledgement.

Retention of title

The products sold remain the entire property of Altra Corporation until their complete and final payment. In the event that the products purchased by the customer are resold, and as long as they have not been paid to Altra Corporation, the customer undertakes to inform the sub-purchaser of the terms of this clause, as well as the right that Altra Corporation reserves to claim in the hands of the sub-purchaser, either the book products or the price thereof.

Receipt of goods

The equipment is sent at the Customer's own risk. Any claim in connection with the loss or imperfections related to the packaging of the products must be made to the transport agency upon receipt of the goods and must be annotated on the carrier's receipt. In this case, the Customer has twenty-four (24) hours to obtain a claim number from the transport agency. The returned material may be accepted subject to verification of the condition of the material and its packaging, as well as its operation. In case of damage to the delivered goods and in order to provide sufficient evidence, the Buyer is obliged to photograph the packages and send the photos to logistics@airzonecontrol.com in order to notify of the problem. Upon receipt of the material, the Customer has fifteen (15) days to inspect the contents and report possible packaging errors or defects in the items. After this period, no such claim will be accepted.

Payment method

No discount is granted in case of early settlement. Payment will be made by bank transfer. In the event of late payment, the applicable penalties shall be equal to 8% of the total invoice with a minimum of 40 € (or its equivalent in the official exchange rate of the currency used in the relevant market). In case of non-payment, Altra Corporation reserves the right to block the account as well as shipments in progress, whether or not they are under warranty.

The goods remain the property of the Seller until full payment.

Likewise, in the event of delay in payment in accordance with the initially agreed deadline, Altra Corporation reserves the right to initiate the necessary legal procedures to obtain collection of the total invoice plus the corresponding penalties for the delay.

Altra Corporation sends invoices by e-mail. Nevertheless, and always at customer's request previously, Altra Corporation could send invoices in paper version.

Commissioning

Altra Corporation does not carry out the installation of its products. However, as indicated in our catalog (see "Commissioning service" in the "Product references" section), the Buyer may call on Altra Corporation for the commissioning of its systems. Altra Corporation will invoice this service carried out by its technical assistance or by one of its technical stations according to the prices in the quotation provided to the Buyer and according to the conditions that can be requested at the email address: techsupport@airzonecontrol.com

Return

Subject to the agreement of Altra Corporation's technical support, the customer has fourteen (14) days from the date of invoice to return the material and obtain a refund, less 20% re-stocking fee of the original invoice price. It must be taking into consideration that the products must be returned in its original unused packaging. The request should be made via the support department's e-mail address: techsupport@airzonecontrol.com. The Customer assumes the cost of transport and ensures the proper packaging of the equipment guaranteeing its good condition upon receipt. The agreement of the sales department does not directly imply the edition of credit. Any return that does not benefit from a prior agreement will be systematically refused upon receipt and will be returned to the sender at their expense. The returned material will only be refunded if the conditions indicated on the material return request are respected.

The transport costs caused by the return of after-sales equipment in non-EU countries will be borne by the buyer.

Guarantee

All products manufactured by Altra Corporation are warranted, for a period of two (2) years, against any manufacturing defect, the date of issue of the invoice of Altra Corporation being authentic, in the context of normal use. The warranty only applies if the installation of the solution is carried out exclusively with Altra Corporation reference elements, both mechanical and electronic (central plates, modules, thermostats, motorizations, and cables). If the required configuration is not explained in any Altra Corporation manual, the Customer is required to contact Altra Corporation technical support to validate the said configuration. However, in the absence of a written reservation from the Customer upon completion of Altra Corporation's technical assistance service, it is understood that Altra Corporation does not provide any guarantee as to the services provided and that any claim not in accordance with this article will be inadmissible.

Packaging

All our electronic products are individually packaged. It is important, in case of return to our premises, that the material is returned in its original packaging.

Hardware under warranty

All products are covered by a thirty-month warranty from shipment or twenty-four months from installation, whichever comes first.

The warranty does not cover damage caused by misuse or normal wear and tear, or defects caused by negligence, knocks, improper use or handling, storage in inadequate conditions that may damage the product, such as extreme temperatures or humidity, unsuitable voltage, electrical incidents, improper installation and/or use that was not carried out by the authorized Technical Service when appropriate, nor materials subject to wear and tear through normal use. The warranty will be void for any products modified or repaired by the Client or any other person not authorized by Altra Corporation.

Repair or replacement of defective products will be free of charge, including the costs incurred to remedy the goods' lack of conformity with the contract, especially the shipping costs, as well as costs related to manual labor and materials. Any finding of malfunction of the Altra Corporation system must be diagnosed by Altra Corporation technical assistance. For further information regarding the warranty procedure, please contact: techsupport@airzonecontrol.com

Force majeure

Neither party shall be liable to the other in the event of delay or non-performance of its contractual obligations in the event of force majeure in the following cases: natural disasters, fires, explosions, or accidents for which it is not responsible, strike movements, epidemics or pandemics recognized by the World Health Organization, or for other reasons beyond its control.

In the event of a case of force majeure, Altra Corporation may temporarily suspend the delivery of the products and/or the performance of the service, without this suspension being considered as a non-performance of the obligations incumbent on it under these GTC. Altra Corporation must then inform the Customer in writing of the suspension of the contract, and if it lasts more than three (3) months, the suspended sales or service contract(s) will be terminated automatically.

Data protection and intellectual property

The Client is invited to consult the website of Altra Corporation: www.airzonecontrol.com and in the footer the client can access the sections of legal notice, privacy policy and cookies policy.

It is strictly forbidden to use and exploit the rights of reproduction, distribution, public communication, and transformation according to Spanish Regulation in force at the time, as well as to use the Altra Corporation logo or any photographs and information of the products of the said entity, without its prior authorisation.

Dispute Resolution

These GTC and any contract concluded pursuant to these GTC are subject to Spanish law.

The parties are subject to Spanish law for the resolution of any conflict that may arise, and expressly waiving any other jurisdiction, the parties are subject to the courts and tribunals of Madrid (Spain).
